Project Demo Planning

Date	19 October 2026
Team ID	
Project Name	Health360: Clinical and healthcare risk analysis
Maximum Marks	1 Mark

Project Demo Planning:

This demo presents Health360, a clinical and healthcare risk analysis solution designed to organize health-related data, highlight potential risk indicators, and help healthcare teams prioritize review. The demonstration focuses on the workflow, data quality, risk-analysis output, and safeguards. Any risk result is decision support and must be reviewed by a qualified healthcare professional.

Demo Plan:

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Explain the need for structured clinical data review and timely identification of potential healthcare risks.	2	Presenter / Team Lead
2	Solution Overview	Introduce Health360, its intended users, main modules, inputs, and overall risk-analysis workflow.	3	Project Presenter
3	Data Input & Validation	Show how sample or de-identified data is entered/imported and how missing or inconsistent fields are flagged.	3	Data / Backend Member
4	Live Feature Demonstration	Run the analysis on sample data, display risk indicators and explain how results can guide further review.	4	Developer / Demo Operator
5	Security & Responsible Use	Describe role-based access, privacy protections, auditability, limitations, and the need for clinician oversight.	2	Security / Documentation Member
6	Q&A; and Closing	Answer questions, summarize benefits and planned improvements, and collect feedback.	2	All Team Members

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	State the problem, target users, and demo objectives.
2	Solution Overview	Explain the Health360 workflow and key components.
3	Live Feature Demonstration	Use sample/de-identified data; explain outputs without presenting them as a final diagnosis.
4	Q&A; Session	Discuss limitations, privacy, future work, and audience feedback.
