Ideation Phase
Empathize & Discover

Date	19 October 2026
Team ID	
Project Name	Health360: Clinical & Healthcare Risk Analysis
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to helps teams better understand their users.
Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Example:

PERSONA: Clinical Risk Analyst & Public Health Officer

Scope: Monitoring 5,000 Patients across 6 Age Demographics.

SAYS	THINKS
• "Need a unified view of patient vitals instead of disconnected spreadsheets." • "Must correlate fatigue, exercise levels, and substance habits with hypertension." • "Require an interactive clinical dashboard for faster preventive decisions."	• Early clinical risk indicators might be missed without clear visual trends. • Lack of exercise combined with smoking accelerates cardiovascular risk. • A 5-point clinical data story will simplify cross-department reporting.
DOES	FEELS
• Analyzes 5,000 patient vitals (Blood Pressure, Fatigue, Exercise, Alcohol & Smoking). • Builds 6 visual charts (Bar, Pie, Stacked Bar, Donut, Substance Bar, Heatmap) in Tableau. • Formulates data-driven lifestyle recommendations for high-risk cohorts.	• Frustrated: Due to time lost in manual tabular data extraction. • Concerned: About delayed lifestyle and clinical interventions. • Confident: When Health360 dashboard provides instant risk clarity.
