Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am: A clinical healthcare provider and public health risk analyst monitoring 5,000+ patient records.

I'm trying to: Identify early clinical health risks (hypertension, severe fatigue, lack of exercise) and deliver proactive interventions.

But: It is difficult to correlate multiple patient lifestyle parameters using disconnected spreadsheets.

Because: Clinical data is fragmented across tables without unified visual analytics.

Which makes me feel: Overwhelmed and concerned about missing critical early warnings.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel

PS-1	A Healthcare Clinician	Monitor and control hypertension and vital metrics across patient age demographics.	Early spikes in blood pressure are missed in routine checkups.	Patient vitals and fatigue metrics are siloed without interactive comparative analytics	Anxious about delayed preventive treatment
PS-2	A Public Health Risk Analyst	Correlate lifestyle habits (alcohol, smoking, exercise tiers) with overall patient risk index scores	Analyzing multi-variable lifestyle dependencies takes too long manually	There is no centralized clinical dashboard to visually map lifestyle risk cross-sections	Frustrated by inefficient decision-making.
